

Adam Boube

IT Student | Frederick, Maryland | (240) 409-2629 | Boube.Adam1@gmail.com | [LinkedIn Profile](#) | [GitHub Portfolio](#)

EDUCATION

Towson University | B.S. Information Technology

Graduation Date: May 2026

Relevant Coursework: Advanced Computer Networking, Applied Network Security, System Administration, Cybersecurity I, Cybersecurity Risk Management, Network Security Practicum, Statistics

EXPERIENCE

Handshake AI

February 2026 - April 2026

AI Training Analyst

Remote

- Trained and evaluated large language models by analyzing prompts and generating high quality, contextually accurate responses.
- Performed data annotation and content validation to improve AI model accuracy, safety, and performance.
- Applied critical thinking and quality assurance methods to identify bias and inconsistencies in AI outputs.

Towson University

August 2025 - December 2025

Cybersecurity Risk Management Researcher

Towson, MD

- Researched risk assessments, evaluation methods, and impact analysis to understand security and risk mitigation approaches.
- Studied frameworks, incident response planning, and resilience strategies in virtual environments aligned with CRMF principles.
- Analyzed cybersecurity risk management, including threats and vulnerabilities, and documented findings with recommendations.

PROJECTS

Active Directory

April 2026

- Deployed and configured Active Directory services to manage users, devices, and authentication in a Windows Server environment.
- Applied Group Policy and performed system troubleshooting to resolve configuration errors and ensure consistent system behavior across client machines.
- Joined client VMs to the domain to ensure consistent authentication, profile management, and the ability to access across all devices.

Enterprise Network Design

[GitHub Repository](#)

- Designed an enterprise network architecture supporting multiple departments and locations, implementing VLAN's, and IP addressing to ensure efficient traffic management.
- Configured routers, switches, and access controls to support connectivity, internal services, and control network access across systems.
- Produced network diagrams and technical documentation outlining topology, schemes, and configurations to support maintenance and troubleshooting.

Application Usability Review

[GitHub Repository](#)

- Performed system testing and troubleshooting by analyzing user interactions, identifying functionality issues, and diagnosing performance limitations within a software interface.
- Investigated system behavior using user session data, logs, and feedback to identify recurring errors, usability issues, and root causes requiring resolution.
- Compiled findings into a detailed technical report and gave recommendations to improve system performance, user experience, and interface accessibility to ensure accurate documentation.

TECHNICAL SKILLS

- **IT Support:** Windows 10/11, Linux, macOS, Active Directory, Microsoft 365, Hardware/Software Troubleshooting
- **Networking:** TCP/IP, DNS, VPN, VLANs, Wi-Fi Configuration, Network Troubleshooting, Wireshark
- **Tools & Platforms:** Windows Server, Cisco Packet Tracer, VMware, Microsoft Office, Microsoft Word, Microsoft Excel
- **Soft Skills:** Communication, Customer Service, Troubleshooting, Teamwork
- **Languages:** English, French

CERTIFICATIONS

- CompTIA Security+ (Pending)
- Google Cybersecurity Certificate
